Yiğit ERBİL

If I want to talk about myself briefly, I am Yigit, 24 years old. My cybersecurity career dream has been my goal from a very young age. I have exploited and continue to use all the resources I can reach on my way to realize this dream. I am currently developing myself in the field of "Cyber Intelligence". At the same time, I am developing my coding side with python. I consider it my duty to develop what I have learned in this process and to share it with those who seek help.
